Game idea: the triangle peg game from Cracker Barrel

People love puzzle games, and this includes the simple triangle peg game. People of all ages try to beat it. However, carrying around this game is tedious, and its pegs are easy to lose. When you lose a peg, you can't play it anymore. With a digital version, people can play it on the go, or on their computer without losing the pegs.

The game works by having 14 pegs in a triangle shape, with an empty space at the top. To beat the game, you must have only one peg left on the board. To remove a peg, you jump a peg over another into an empty space. The peg that was jumped over is removed. You keep doing this until there are no more moves you can make, or there is only one peg left.
